

USAGE:

1. SOUNDSATION TG100 is a desktop gooseneck microphone is a professional microphone designed for applications such as large-scale conferences, public addresses, outdoor speeches etc.

It adopts a back electret condenser cartridge, which delivers bright and clear sound. This uni-directional microphone featuring high sensitivity and low self-noise can operate by battery power or via phantom power received from an external device like a mixer . Its flexible gooseneck can be adjusted smoothly and quietly to fit any needs and situations and a red LED conveniently mark the on-off state. The zinc base of the microphone has been designed with focus on stability and duration over time.

1. Install two 1.5V AA batteries at the base of the gooseneck microphones. (be aware of their polarities). If using the phantom power, please connect the parts according to the following drawing.

2. Connect the gooseneck microphone to its base.
3. Plug the XLR connector of the attached cable and connect the microphone to a mixer.
4. Turn the volume control down to zero then turn on the power switch of both the mixer and the microphone and adjust the volume.
5. The best distance from the microphone cartridge while speaking should be kept at 5 to 30 cm.

TECHNICAL SPECIFICATIONS

Element : ϕ 9.7mm Back Electret Condenser

Polar Pattern: Uni-directional

Frequency Response: 100Hz-13kHz

Sensitivity: $-38\text{dB} \pm 3\text{dB}$ ($0\text{dB}=1\text{V}/\text{Pa}$ at 1kHz)

Output Impedance: $200\Omega \pm 30\%$ (at 1kHz)

Operating Voltage: Phantom Power 9-52V or 3V Battery

Battery Type: AA/UM3, 1.5V

WARNING

1. Do not cover the microphone cartridge by hands or install the unit close to speakers as it may cause howling noise. If this happens, simply turn down the volume, take the microphone further away from the speakers, and let the cartridge not face the speakers
2. Only use attachments/accessories specified by the manufacturer.
3. Unplug this apparatus during lightning storms or when unused for long periods of time.
